Pattern (Ticking)	10
Color	10

CATEGORY: Traditional.

DIVISIONS: Tabby and Silver/Smoke.

COLORS: Limited to eumelanistic colors agouti pattern only.

PERMISSIBLE OUTCROSSES: None.

Shape: Modified wedge with rounded as viewed from the front. A rise bridge of the nose to the forehead evidence of a sharp break. The should be of ample length in general with the rest of the cat and gently from the forehead over the skull into an arched neck.

Ears: Large, alert, and moderately broad and cupped at base and forward, set as though listening. Hair short and close-lying, preferably in conformity with the color requirements. A "thumb print" marking is on the back of the ear.

Eyes: Almond shaped, large, brilliant expressive. Skull aperture follows shape of eyes being neither round oriental. Eyes accentuated by darker lid encircled by a light colored area. each eye appears a short vertical pencil stroke amidst the light area. At of each eye appears a curved pencil line as if a continuation of the eyelid. Eye Color to be gold, copper, hazel, the more richness and depth the better. There is no relationship coat and eye color.

Muzzle: The muzzle shall follow gentle in conformity with the head as viewed from the front and in profile. Chin shall be full and neither projecting nor receding, having a rounded appearance. Allowance to be made for jowls in adult males. The muzzle shall not be sharply pointed and there shall be no evidence of snappiness, foxy appearance or whisker pinch.

Profile: Without flat planes, showing gently curved transition between brow, nose and muzzle.

BODY:

Torso: Medium long, lithe and graceful, showing well developed muscular strength without coarseness and is solid to the feel.

The rib cage is rounded with no evidence of flat sides. The back is slightly arched giving the appearance of a cat about to spring.

The flank shall be reasonably level without tuckup.

Proportion and general balance to be desired more than mere size.

Legs: Proportionately slim, long and well-muscled. The Abyssinian/Somali stands well off the ground.

Feet: Oval and compact. When standing, giving the impression of being on tip toe.

Tail: Long and tapering.

Musculature: Well-developed muscular strength without coarseness and solid to the feel.

COAT/COLOR/PATTERN:

Length (AB): Coat resilient to the touch with a lustrous sheen, fine in texture.

Medium length, long enough to accommodate four to six alternating light and dark colored bands. The coat lies fairly close to the body; however, the undercoat should be adequate enough to avoid any evidence of slickness. Woolliness undesirable. Coat is longest at the spine, gradually shortening over the saddle, flank, legs and head.

Length (SO): The coat, very soft to the touch, is extremely fine-textured and doublecoated.

Semi-long length, except over shoulders where a slightly shorter length is permitted. The more dense the coat the better. Preference is to be given to a cat with ruff and breeches.

Pattern: Coat pattern is genetically a form of agouti ticking with even, dark-colored ticking contrasted with lighter bands giving a translucent effect.

TABBY DIVISION: The colors of the Abyssinian/Somali in the Tabby Division should reflect warmth of color, giving the impression of a colorful cat. The more rufousing and depth of color the better. Deeper shades/tones preferred. Darker shading along spine allowed. White or offwhite

to be confined only to the upper throat area, lips and around nostrils. Preference to be given to a good, even ticking.

SILVER/SMOKE DIVISION: In the Silver Division, only the undercoat color will be different from the Tabby Division, with the six colors of ticking being the same in both divisions. In all Silver varieties, the desirable undercoat color is to be icy white, with ticking appropriate to the particular color, giving an overall sparkling silver effect. The orangebrown/sorrel/cream bands within the ticking of the Traditional Tabby Division colors are replaced with white, with the band adjacent to the skin being the lightest. Yellow or brown pigmentation on the chest, belly, under tail, or inside of legs is not desirable, although minor patches of rufousing are not to be considered a fault if the overall impression is of silver. Some rufousing may be present in the areas of ticking, especially along the spine, and the rufous polygenes may have a small effect on the silver

undercolor as well, although lack of rufousing is more desirable.

GENERAL: The overall impression of the ideal Abyssinian/Somali is a medium cat, regal in appearance. The Abyssinian/Somali is foreign in type. Males proportionately larger than females, the female being finer boned and usually more active than the male. The Abyssinian/Somali shows firm muscular development and is lithe and panther-like in activity, showing a lively interest in all surroundings. The coat of the Abyssinian/Somali has an iridescent quality. Coat pattern is genetically a form of agouti ticking with even, dark-colored ticking contrasted with lighter bands giving a translucent effect. The Abyssinian/Somali is of sound health and vigor, well-balanced physically and temperamentally gentle and amenable to handling.

PENALIZE:

Color Faults: Cold, gray or sandy tone to coat color in ruddies, chocolates, or cinnamons or gray hair next to skin with absence of correct undercoat color. Distinct broken necklaces, leg bars, mottling or speckling in unticked areas (underside of body, chest and inside legs), tabby stripes or bars. Slick coat or excessive plushness. Wrong color or patching in pads.

Ticking and Pattern Faults: Unevenness of ticking over body, lack of desired markings on head and tail.

Condition: Flabbiness of body, lack of coat luster, eye color, evidence of illness, emaciation and lack of muscle tone are faults and points shall be deducted.

WITHHOLD ALL AWARDS (WW):

Unbroken necklace. Reversed ticking (outermost tip of hair light instead of dark). In the Tabby division, white locket or white anywhere on the body other than around nostril, chin and upper throat areas.

★ ★ ★ ★ ★ ★ ★ ★

* All breeds must to present a unchallenging temperament; the cat may show fear, seek to flee, or may complain aloud, but may not threaten to hurt. Any sign of definite threat shall disqualify. Disqualifications: a cat that bites, a cat that shows evidence to deceive, adult whole males with not two descended testicles, cats with parts or whole tail missing or with tails faults (except the approved breeds), polydactyl cats (except the approved breeds), crossed eyes, total blindness, smaller size for the breed, depression of the sternum or usually small diameter of the rib cage itself.
